

Description of Commercial Cucurbit Rootstocks as of February 5, 2015

Common Tomato Diseases and Pests and Susceptibility Characteristics

Rating rootstock (RS) characteristics is complex because strains of pathogens differ and plant responses to them are rarely “yes” or “no.” Therefore, approaches to and outcomes of rating RSs differ. This table was compiled using only publicly available information provided by seed companies in catalogs and at websites. Companies refer to RSs generically as “resistant” (R below). Others describe RS resistance to a disease or pest as high, full or complete (HR below) or partial or intermediate (IR below). Others use numerical scales which have been converted to R, HR and IR below.

Rootstock Cultivar	Rootstock Species	Crop Scion	Bacterial Wilt	Powdery Mildew	Fusarium Wilt Race 1	Fusarium Wilt Race 2	Rhizoctonia Root Rot	Verticillium Wilt	Root-knot Nematode	Melon Necrotic Spot	Developer
Affyne	N/A	cucumber			R	R		R			Rijk Zwaan
Ancora	<i>C. moschata</i>	cucumber									Takii Seed
AQ	N/A	pumpkin			R	R		R			Origene Seeds
Assisto	N/A	melon			R	R				R	Takii Seed
Aurora F1	N/A	watermelon			R	R		R			Nickerson-Zwaan
Azman RZ F1	N/A	cucumber			HR	HR		HR			Rijk-Zwaan
<i>B.hispida</i>	<i>Benincasa hispida</i>	N/A									N/A
Bass BS-1 F1	N/A	N/A			R	R					Origene Seeds
Bingo	<i>Lagenaria siceraria</i>	N/A			HR	HR		R			Takii Seed
<i>C. ficifolia</i>	<i>Cucurbita ficifolia</i>	cucumber									N/A
Carnivor	<i>Cucurbita maxima</i>	watermelon, cucumber, melon			R	R		R			Syngenta
	<i>x C. moschata</i>										
Cirrus F1	N/A	watermelon			R	R		R			Hazera
Cobalt	<i>Cucurbita maxima</i>	cucumber, melon, watermelon			R	R		R			Rijk Zwaan
	<i>x C. moschata</i>										
Custodian	N/A	cucumber			HR	HR					Takii Seed
Dragon-2	N/A	cucumber			R	R			R		BF Agritech
DRO5018	N/A	N/A									DeRuijter Seeds
Eso Shut	N/A	watermelon			R	R				R	Asahi Industries
Excite ikii	N/A	cucumber									Sakata Seed

For additional information on rootstocks, contact the developer and Cooperative Extension and visit a compilation of related technical resources (www.vegetablegrafting.org/reference-database/).

This table was developed with support provided by USDA-National Institute of Food and Agriculture (NIFA) (Specialty Crop Research Initiative Award # 2011-51181-30963;

“Development of Grafting Technology to Improve Sustainability and Competitiveness of the U.S. Fruiting Vegetable Industry”), institutions participating in that project and their

collaborators. Please direct questions and comments about the table to Dr. Matthew D. Kleinhenz, Dept. of Horticulture and Crop Science, The Ohio State University-OARDC. Page 1 of 5
